

ARTICLE I
Risk Management Policy

The safety and well-being of our chapter members is the goal of risk management. It is imperative that all members of Alpha Omicron Pi assume a leadership role in risk management and the reduction of liability exposure through responsible living and proactive education in the areas of health, welfare and safety.

While the management of the risks associated with fraternity membership is the responsibility of the entire collegiate chapter, the Vice President of Standards is charged with providing members the education necessary to make informed decisions regarding these risks and the legal liability and responsibility of our chapters, their members and advisers.
