

ALPHA OMICRON PI

Properties

Alpha Omicron Pi
International Headquarters

5390 Virginia Way
Brentwood, TN 37027

615.370.0920

Alpha Omicron Pi properties across the U.S. and Canada will remain open for those who need accommodations. In regard to colleges or universities who are facilitating online classes or asking students to return home, please feel free to do as is best for you. But know if you should choose to stay; we will remain open and provide all services typically offered at your AOII facility.

Please communicate your members' intentions, whether staying in the chapter facility or leaving campus, with your chapter's House Director or collegiate Property Manager. We will send directives to appropriate chapter leadership about gathering information for each member's plan.

Should you intend to, currently are, or have already traveled internationally (outside of North America) for Spring Break or a study abroad trip – please follow your university released guidelines regarding self-quarantine procedures or protocols during this time.

During the concern around Coronavirus, COVID-19, we strongly suggest restricting access to chapter facilities to only those who currently live in the facility. This is to limit the potential exposure of our members living in the house; however, this decision can be made on the local level in conjunction with chapter leadership. If your campus has implemented any restrictions for students living in on-campus facilities, please follow all guidelines released by the university. As this situation continues to evolve and your university situation could change, please stay up to date with all communication from both the university and Alpha Omicron Pi. University owned AOII facilities will need to follow suit with the University at their directive.

We will continue to monitor this situation and provide additional updates if necessary.

Should you have outstanding questions, please follow up with your chapter's appropriate Assistant Director of Properties. Their contact information is listed below.

Brook Clifford – Networks 1, 4, & 5 at bclifford@alphaomicronpi.org
Andi-Tomko Williams – Networks 2, 3, & 7 at atomkowilliams@alphaomicronpi.org
